

“Putting **Wi-Fi** in schools; allowing **cordless phones** that radiate constantly to be manufactured; placing **wireless baby monitors** near an infant; using a **wireless tablet, smart phone** or **computer** while pregnant; holding a **cell phone** next to the head and keeping a cell phone in a bra or hip pocket or under a pillow; placing **cell phone antennas** near homes, schools and on hospitals; metering electricity, water and gas with **wireless smart meters** and designing **smart appliances** for the home will be viewed by future generations as **dumb technology** generated by **greed** for a population that is largely ignorant of the consequences. We need to protect the health and wellbeing of future generations, because without them there is no future! If we don't do it . . . who will?” Dr Magda Havas, PhD, Environmental and Resource Studies, Centre for Health Studies, Trent University, Canada. www.emfscientist.org

Did you know?

The brain and heart are electrical organs and cardiac effects via electrical control of the heart have been observed. If you have any of these conditions, EMF exposure is a major contributing factor:

Cardiac arrhythmias (associated with sudden cardiac death)

Atrial fibrillation / atrial flutter

Premature atrial contractions (PACs) and premature ventricular contractions (PVCs), also known as heart palpitations

Tachycardia (fast heartbeat)

Brachycardia (slow heartbeat)

Take immediate and aggressive steps to remediate your exposure

Professor Emeritus Martin Pall PhD and Mercola J Dr, The Harmful Effects of Electromagnetic Fields Explained September 3, 2017

A graphic for the EMF Protection Project. It features a red-tinted background with a glowing globe at the bottom. Overlaid on the globe are numerous red, glowing lines that form a complex network, resembling a global communication or data network. The lines are interconnected and have a soft, ethereal glow. The text "EMF PROTECTION PROJECT" is written in a bold, white, sans-serif font across the middle of the image.
