

“Putting **Wi-Fi** in schools; allowing **cordless phones** that radiate constantly to be manufactured; placing **wireless baby monitors** near an infant; using a **wireless tablet, smart phone** or **computer** while pregnant; holding a **cell phone** next to the head and keeping a cell phone in a bra or hip pocket or under a pillow; placing **cell phone antennas** near homes, schools and on hospitals; metering electricity, water and gas with **wireless smart meters** and designing **smart appliances** for the home will be viewed by future generations as **dumb technology** generated by **greed** for a population that is largely ignorant of the consequences. We need to protect the health and wellbeing of future generations, because without them there is no future! If we don't do it . . . who will?” Dr Magda Havas, PhD, Environmental and Resource Studies, Centre for Health Studies, Trent University, Canada. www.emfscientist.org

Did you know?

EMF is killing many of us prematurely

I'm here with disturbing news about our favorite gadgets: cell phones, tablets, wi-fi, etc. Putting it bluntly, they are damaging the living cells in our bodies and killing many of us prematurely. One study shows that as cell phone usage has spread widely, the incidence of fatal brain cancer in younger people has more than tripled... We are putting cellular antennas on residential buildings, and on top of hospitals, where people are trying to get well... It's particularly frightening that radiation from our telecommunication and powerline technology is damaging the DNA in our cells. It is clear to many biologists that this can account for the rising cancer rates...

Dr Martin Blank from the Department of Physiology and Cellular Biophysics at Columbia University on behalf of **The International EMF Scientist Appeal** presented to: His Excellency Antonio Guterres, Secretary-General of the United Nations; Honorable Dr Tedros Adhom, Director-General of the World Health Organization; Honorable Achim Steiner, Executive Director of the UN Environmental Programme; UN Member Nations. As of 30 August 2018, 244 EMF scientists from 41 nations have signed the Appeal.

SUGGESTION: Eliminate EMF as much as possible from your life
