

“Putting **Wi-Fi** in schools; allowing **cordless phones** that radiate constantly to be manufactured; placing **wireless baby monitors** near an infant; using a **wireless tablet, smart phone** or **computer** while pregnant; holding a **cell phone** next to the head and keeping a cell phone in a bra or hip pocket or under a pillow; placing **cell phone antennas** near homes, schools and on hospitals; metering electricity, water and gas with **wireless smart meters** and designing **smart appliances** for the home will be viewed by future generations as **dumb technology** generated by **greed** for a population that is largely ignorant of the consequences. We need to protect the health and wellbeing of future generations, because without them there is no future! If we don't do it . . . who will?” Dr Magda Havas, PhD, Environmental and Resource Studies, Centre for Health Studies, Trent University, Canada. [www.emfscientist.org](http://www.emfscientist.org)

## Did you know?

### EMF

Everything electrical, electronic and wireless emits EMF

– Electromagnetic Fields –

also referred to as EMR – Electromagnetic Radiation

Sources include: electrical wiring, powerlines, substations, transformers, computers, microwave ovens, wi-fi, mobile phones, mobile phone towers, baby monitors, wireless baby monitors, electricity meters, smart meters, solar panel technology, wind turbines and many more ...

**SUGGESTION:** Eliminate EMF as much as possible from your life

**EMF PROTECTION PROJECT**
