

“Putting **Wi-Fi** in schools; allowing **cordless phones** that radiate constantly to be manufactured; placing **wireless baby monitors** near an infant; using a **wireless tablet, smart phone** or **computer** while pregnant; holding a **cell phone** next to the head and keeping a cell phone in a bra or hip pocket or under a pillow; placing **cell phone antennas** near homes, schools and on hospitals; metering electricity, water and gas with **wireless smart meters** and designing **smart appliances** for the home will be viewed by future generations as **dumb technology** generated by **greed** for a population that is largely ignorant of the consequences. We need to protect the health and wellbeing of future generations, because without them there is no future! If we don't do it . . . who will?” Dr Magda Havas, PhD, Environmental and Resource Studies, Centre for Health Studies, Trent University, Canada. www.emfscientist.org

Did you know?

EHS

Electro Hyper Sensitivity

Many of the symptoms of EHS closely resemble the symptoms of MS. The symptoms of EHS, CFS, fibromyalgia and Gulf War Syndrome are all virtually identical to those of RF sickness. EHS people are the 'canaries in the coal mine' who immediately feel the effects of radio waves. We are all sensitive to electromagnetic radiation though, and every person is affected by 'electrical poisoning'.

*With enough exposure, it is possible that EHS could manifest in all members of the population. Many children are affected but undiagnosed. They are more likely to develop EHS since their exposure is higher and their systems are developing.*¹
