

“Putting **Wi-Fi** in schools; allowing **cordless phones** that radiate constantly to be manufactured; placing **wireless baby monitors** near an infant; using a **wireless tablet, smart phone** or **computer** while pregnant; holding a **cell phone** next to the head and keeping a cell phone in a bra or hip pocket or under a pillow; placing **cell phone antennas** near homes, schools and on hospitals; metering electricity, water and gas with **wireless smart meters** and designing **smart appliances** for the home will be viewed by future generations as **dumb technology** generated by **greed** for a population that is largely ignorant of the consequences. We need to protect the health and wellbeing of future generations, because without them there is no future! If we don't do it . . . who will?” Dr Magda Havas, PhD, Environmental and Resource Studies, Centre for Health Studies, Trent University, Canada. www.emfscientist.org

Did you know?

WI-FI in SCHOOLS

Wi-Fi systems in school districts are usually much higher strength because they are designed to operate hundreds of computers simultaneously, unlike home-based consumer systems that only operate a handful of computers

<https://ehtrust.org/take-action/educate-yourself/children-and-wireless-faqs/>

SUGGESTION: Limit Wi-Fi exposure in schools if it is not possible to be taken out

EMF PROTECTION PROJECT
